

# Part IS Risk for Avionics

# Focus:

- Information Systems that could lead to an aircraft accident or incident.
  - Information Systems which provide the database downloads.
  - Information Systems which provide interfaces between the databases and the aircraft.
  - Information Systems which provide electronic recordkeeping.

# Risk:

## R1 (Highest): Access to Electronic Aircraft Systems

- Uploading Aircraft Software (database, operating systems)

# Risk:

R2 (Medium): Provide Electronic Aircraft Records to Customer

- Electronic airworthiness records

# Risk:

R3 (Lowest/no IS risk): No access to Aircraft Electronic Systems or Electronic Records

- Analog interface with aircraft (non-electronic hardware) or records (paper records)

# Mitigations:

Restrict “working computers” from accessing emails/internet other than OEM download sites.

# Mitigations:

M1 – R1:

Restrict the computer used to download databases; run Malware search prior to downloads.

# Mitigations:

M2 – R2:

Restrict the computer used for Electronic Recordkeeping.

# IT Security Training

- January 2026
