

AEA Regionals

Ric Peri

Vice President
Government & Industry Affairs

Agenda:

- Rulemaking
- Rulemaking Committee Work
- AEA/Authority Liaison
- Industry Coordination Work

Repair Station Training Program

(14 CFR 145.163)

- 301. INDOCTRINATION (INITIAL AND RECURRENT) TRAINING.
- The following subjects should be addressed in the training program, regardless of the repair station's size or ratings:
 - (1) CFR requirements, particularly those associated with the repair station maintenance functions and authority as reflected on the certificate and operations specifications.

Rulemaking

Modernization of Special Airworthiness Certification

- Comment Period Closed: March 11, 2024
- Final Rule Published July 2025
- Effective Date: October 22, 2025
July 24, 2026

Mosaic - Aircraft

- maximum seating capacity of not more than four persons,
- Have a maximum stalling speed or minimum steady flight speed at the aircraft's maximum takeoff weight and most critical center of gravity of 61 knots CAS VS0 for an airplane,
- maximum speed of 250 knots CAS
- non-pressurized cabin
- Not have been previously issued a standard, primary, restricted, limited, or provisional airworthiness certificate, or an equivalent airworthiness certificate by a foreign civil aviation authority.
- ** More capable aircraft: night, IMC, etc.

Mosaic - Pilot

- Weight -- Not prescribed.
- Engine - Not prescribed
- Maximum airspeed -- Not prescribed.
- Maximum stall speed -- 59 knots (VS1) CAS for airplanes only,
- Pilot endorsements -- For simplified flight control designated aircraft, night operations, controllable pitch propeller, and retractable landing gear.

Mosaic - Maintenance

- Repairman
 - Performance-based training
 - downward authority to EAB
- Alterations
 - Simplified process for third-party alterations. TBD

Normalizing Unmanned Aircraft Systems Beyond Visual Line of Sight Operations

- Published: August 07, 2025
- Comment Period Closed: October 6, 2025
- Final Rule Published: ??????

Rulemaking

- BVLOS (Part 108) NPRM
 - Aircraft
 - Package delivery. – 55lbs
 - Aerial surveying/ Civic interest – 110 lbs
 - Agriculture – 1320 lbs
 - Maintenance
 - Part 43 “like” – must follow methods techniques and practices (maintenance manual)
 - Repairman “like” qualified and authorized – but not certificated.

BVLOS (Part 108) NPRM

- Under proposed §108.195 and the proposed amendments to §91.113, UA operating under part 108 would be required to yield to all manned aircraft broadcasting their position using ADS-B or electronic conspicuity equipment, and those operating in specific locations.

§ 91.113 Right-of-way rules:

- FAA is proposing to adopt the BVLOS ARC's recommendations related to giving UA right-of-way in shielded areas, giving manned aircraft broadcasting their position using ADS-B Out equipment or electronic conspicuity equipment right-of-way over part 108 UA, and giving part 108 UA right-of-way over manned aircraft who are not broadcasting.

Falsification, Reproduction, Alteration, Omission, or Incorrect Statements

- The proposal would remove the falsification regulations for manufacturing (14 CFR §21.2), maintenance (14 CFR §43.12), and repair stations (14 CFR §145.12) and consolidate them in a general falsification regulation under 14 CFR part 3, Subpart D—Falsification, Reproduction, Alteration, Omission, or Incorrect Statements.
- NPRM: Comment Period Closes: April 08, 2024
- Final Rule September 3, 2025
- Effective November 3, 2025.

Intentional falsification

- (1) a false representation,
 - (2) in reference to a material fact, and
 - (3) made with knowledge of its falsity.
-
- The United States Supreme Court has identified that fraud consists of those three elements plus
 - (4) the intent to deceive and
 - (5) with action taken in reliance upon the representation.

PART 3—GENERAL REQUIREMENTS

§3.1 Applicability.

(a) This subpart applies to any person who makes a record regarding:

NEW -- Subpart D—Falsification, Reproduction, Alteration, Omission, or Incorrect Statements

Sec.

3.401 Applicability and definitions.

3.403 Falsification, reproduction, alteration, or omission.

3.405 Incorrect statement or omission.

§3.401 Applicability and definitions.

(a) This subpart applies to any person subject to the requirements in subchapter A (except parts 1 and 3), subchapter C (except part 39), subchapter D, subchapter E (except parts 71 and 73), subchapter F (except parts 95 and 97), subchapter G (except part 110), subchapter H, and subchapter K (except parts 185, 187, 189, and 193), of this chapter.

§3.401 Applicability

- Subchapter A - Definitions and General Requirements
- Subchapter C - Aircraft
- Subchapter D - Airmen
- Subchapter E - Airspace
- Subchapter F - Air Traffic and General Operating Rules
- Subchapter G - Air Carriers and Operators for Compensation or Hire: Certification and Operations
- Subchapter H - Schools and Other Certified Agencies
- Subchapter K - Administrative Regulations

§3.401 Applicability and definitions.

(b) For purposes of this part, “document in any format” includes documents (electronic or physical), and also other tangible items, such as data plates or marked parts.

§3.403 Falsification, reproduction, alteration, or omission.

(a) No person may make or cause to be made any fraudulent or intentionally false statement in:

(1) Any document in any format, submitted under any provision referenced in §3.401, consisting of or related to any acceptance, application, approval, authorization, certificate, rating, declaration, designation, qualification, record, report, request for reconsideration, or similar; or

(2) Any document in any format that is kept, made, or used to show compliance with any requirement under the provisions referenced in §3.401.

§3.403 Falsification, reproduction, alteration, or omission.

(b) No person may make or cause to be made any production, reproduction, or alteration, for fraudulent purpose, of:

(1) Any document in any format, submitted or granted under any provision referenced in §3.401, consisting of or related to any acceptance, application, approval, authorization, certificate, rating, declaration, designation, qualification, record, report, request for reconsideration, or similar; or

(2) Any document in any format that is kept, made, or used to show compliance with any requirement under the provisions referenced in §3.401.

§3.403 Falsification, reproduction, alteration, or omission.

(c) No person may knowingly omit, or cause to be omitted, a material fact in:

(1) Any document in any format, submitted under any provision referenced in §3.401, consisting of or related to any acceptance, application, approval, authorization, certificate, rating, declaration, designation, qualification, record, report, request for reconsideration, or similar; or

(2) Any document in any format that is kept, made, or used to show compliance with any requirement under the provisions referenced in §3.401.

§3.403 Falsification, reproduction, alteration, or omission.

(d) The commission by any person of an act prohibited under paragraphs (a) through (c) of this section is a basis for:

(1) Denying, suspending, modifying, revoking, rescinding, removing, or withdrawing any acceptance, application, approval, authorization, certificate, rating, declaration, designation, qualification, request for reconsideration, or similar, issued or granted by the Administrator and held by that person; or

(2) A civil penalty.

§3.405 Incorrect statement or omission

(a) The following may serve as a basis for suspending, modifying, revoking, rescinding, removing, or withdrawing an acceptance, approval, authorization, certificate, rating, declaration, designation, qualification, or similar, or denying an application or request for reconsideration, or similar, issued or granted by the Administrator:

§3.405 Incorrect statement or omission

(a) (1) An incorrect statement or omission of fact by any person, in or from any document in any format, submitted under any provision referenced in §3.401, that was material to the issuance, validity, or granting of that acceptance, application, approval, authorization, certificate, rating, declaration, designation, qualification, request for reconsideration, or similar;

§3.405 Incorrect statement or omission

(a) (2) An incorrect statement or omission of fact by any person, in or from any document in any format that is kept, made, or used to show compliance with any requirement under the provisions referenced in §3.401, that was material to the issuance, validity, or granting of that acceptance, approval, authorization, certificate, rating, declaration, designation, qualification, request for reconsideration, or similar.

Inspection Programs for Single-Engine Turbine-Powered Airplanes and Unmanned Aircraft; Miscellaneous Maintenance-Related Updates

- NPRM
 - Directly affecting repair stations by proposing to amend:
 - 14 CFR 145.109 by removing the last sentence and its prescriptive list of documents in §145.109(d).
 - §§145.201(a)(2) and 145.217 (Contract Maintenance),
 - Comment Period Closes: April 1, 2024
 - Final Rule Expected: 2025

Rulemaking Committee Work

- Aviation Rulemaking Committee (ARC)
 - Change Product Rule (21.101)
 - Instructions for Continued Airworthiness (21.50)
 - Investigative Technology (New technologies)

AEA/Authority Liaison

- FAA/Industry Listening Session (AC 43.13-1B)
 - Purpose:
 - correct errors;
 - update technologies;
 - modernize format.

Industry Coordination Work

- Bilateral Aviation Safety Agreement:
 - Certificate Management Team (CMT)
 - Maintenance Management Team (MMT) –
- Digitization Working Group
- FAA Reauthorization Section 810 (ADS-B)

Industry Coordination Work- SMS

- AEA Developed an SMS program for repair stations in 2013.
- Slow rollout for the past decade with the program used in limited numbers on six continents (North & South America; Europe; Australia; Africa; New Zealand)
- SMS Standard for maintenance endorsed by AEA, ARSA, and VAI.

EASA/FAA MAG: SMS

- MAG Change 10: Entry into Force: October 10, 2025
 - added new SMS special condition
 - added new SMS special condition EASA
 - supplement requirement Form 8, added paragraph 20 SMS

InFO 24007

- **Subject:** Safety Management System (SMS) Requirement for Repair Stations Located in the United States (U.S.) Holding or Seeking European Union Aviation Safety Agency (EASA) Part-145 Approval.
 - Information for Operators
 - InFO 24007
 - DATE: 06/11/24
 - Revised:07/08/25

InFO 24007

- For new applicants, including reinstatement after surrender or suspension, after February 10, 2025,
- For EASA part 145 certificate holders that have not established an SMS that meets the Special Condition by the October 10, 2025, deadline.
- For certificate holders that have developed, integrated, and implemented an SMS.

InFO 24007

- The declaration of compliance must contain the company's name, physical address, certificate number, and a statement that the company has developed and implemented an SMS that meets the SMSVP.
- AC 120-92D
 - 2.6.2 (Definition)
 - 3.2.5.3.2 (Content of Declaration of Compliance)

SMS Voluntary Program (SMSVP)

- How much time do I have to implement the changes to part 5?
 - IF you have an Accepted SMS (Active Conformance) you have 12 Months – May 28, 2025
 - IF you are a “New Entrant” you submit a declaration of compliance after development and implementation of SMS meeting part 5 requirements

Webinar

- Integration of SMS into repair station
 - Date: October 29, 2025
 - Time: 1 p.m. – 2 p.m. Eastern
- Monthly through March 2026

Workforce

Part 65.101 Repairman Certificate Portability Working Group:

** § 65.101 Eligibility requirements:

§ 65.101 Eligibility requirements:

(a) To be eligible for a repairman certificate a person must

(5) Have either—

- (i) At least 18 months of practical experience in the procedures, practices, inspection methods, materials, tools, machine tools, and equipment generally used in the maintenance duties of the specific job for which the person is to be employed and certificated; or
- (ii) Completed formal training that is acceptable to the Administrator and is specifically designed to qualify the applicant for the job on which the applicant is to be employed; and

§ 65.101 (a)(5)(ii):

From the 1982 Final Rule ([13305-13317.pdf](#))

Proposal 18. Notice 80-23 proposed to amend § 65.101 to allow formal training to be substituted for the practical experience now required for repairman certificate eligibility. One commenter agreed with the substance of the , proposal, with the exception that completed formal training should have the prior approval of the Administrator instead of being reviewed for acceptability for completion.

§ 65.101 (a)(5)(ii):

From the 1982 Final Rule ([13305-13317.pdf](#))

Because of the diversity and uniqueness of training associated with repairman ratings, it would be impractical to establish national uniform training standards necessary for prior approval of training programs.

§ 65.101 (a)(5)(ii):

From the 1982 Final Rule ([13305-13317.pdf](#))

Conversely, FAA certificated air agencies, aviation manufacturers, and air carriers are best able to establish that formal training which will qualify the repairmen they employ to perform or supervise the maintenance of aircraft or components at its facilities.

The FAA can then review the training and determine if it is acceptable.

§ 65.101 (a)(5)(ii):

From the 1982 Final Rule ([13305-13317.pdf](#))

This amendment will provide a logical alternative to the 18 months of practical experience formerly required for repairmen eligibility and still provide an equivalent level of competency.

Accordingly, this proposal is adopted without substantive change.

§ 65.101 (a)(5)(ii):

AEA's position:

Since this provision of part 65 was implemented a decade before the establishment of the Repair Station Training Program, we suggest that the "approved training program" provisions of 145.163 exceed the "acceptability" criterion of 65.101 (a)(5)(ii).

We are asking the FAA to revise their policy on repairman qualification to better align with the 1982 Final Rule?
