

MAX-VIZ

ENHANCED VISION SYSTEMS

AEA South Pacific Regional

What Does Max-Viz Do?

Design, certify, and manufacture Enhanced Vision Systems (EVS) for many different markets and missions.

- Affordable
- Light weight
- High MTBF
- Intuitive to use, simple to install
- Superior support

24 Years of EVS; More Systems Installed Than All Other Manufacturers Combined

Leonardo AW169 – EVS2300 Installation

Over 100 MV2300s delivered

What Does Enhanced Vision Systems (EVS) Do?

EVS is used for improving Situational Awareness By Seeing Thru:

- Darkness
- Smoke
- Haze
- Light Fog
- Dust

Mission Types

- Firefighting
- Search & Rescue
- Law Enforcement
- Military
- EMS
- Oil & Natural Gas
- Crop Dusting
- Drones / Autonomous
- General Aviation

Enhanced Vision Solutions

Single & Dual Sensor Systems

➤ Single Sensor Systems

» MV1200+

» MV1400+

➤ Dual Sensor Systems

» MV2300+

Max-Viz 1200+

Single Sensor System

- Surface Mounted Design for Easy Installation
- 320 x 240 Long-Wave Infrared Sensor (LWIR)
- Dimensions 7.80cm W; 15.65cm D; 5.31cm H
- Weight 0.56kg
- Video Output RS170 Composite
- DO-160G qualified
- 50° Field of View
- Software Design Assurance Level D

Max-Viz 1400+

Single Sensor System

- Surface Mounted Design for Easy Installation
- 640 x 480 Long-Wave Infrared Sensor (LWIR)
- Dimensions 7.80cm W; 15.65cm D; 5.31cm H
- Weight 0.56kg
- Video Output RS170 Composite
- DO-160G qualified
- Software Design Assurance Level D
- Zoom & Polarity Selections via Discrete Switching
- Polarity Select Allows Pilot to Change from White Hot to Dark Hot
- Zoom (50° to XX°) Field of View

Max-Viz 2300+

Dual Sensor System

- Imbedded Mount via Customer Supplied Fairing
 - » Ruggedized for Harsh Environments
- LWIR & Visible Light Sensors Blended to See LED Lighting
 - » 640 x 480 Long Wave Infrared Sensor (LWIR)
 - » 1200 x 800 Visible Light Sensor
 - » Dynamic Range Management (patented) Prevents Blooming
- Dimensions 71mm x 172mm
- Weight 1.2kg
- Video Output RS170 Composite
- DO-160G qualified
- Software Design Assurance Level D
- Zoom Field of View (50° to XX°) (95° to XX°) FOV Selections via Discrete Switching
- Separate 720 x 480 Color Output Used for Entertainment System or Recording Device

MAX-VIZ HELICOPTERS STC LIST

Airbus Helicopter

AS350-Series-Approved for MV 1200,1400 and 2300 FAA STC SR04535NY, TCCA STC SH20-25 and Brazilian ANAC 20244S11-01

EC130 Series-Approved for MV 1200,1400, and 2300 FAA STC SR04535NY, TCCA STC SH20-25 and EASA STC 10075862

Bell Helicopters

212,412,412CF and 412EP Approved for MV 2300 FAA STC SR00532DE and TCCA STC SH18-16

206 and 407 Series Approved for the MV1200 and MV1400 FAA STCSR04458NY and TCCA STC SH19-55

429 Approved for the MV1400 and 2300 FAA STC SR04654NY and TCCA STC SH21-17

214ST Approved for MV1400 FAA STC SR04705NY and TCCA STC SH21-17

Leonardo Helicopters

A109 and AW119 Series Approved for the MV2300 FAA STC SR0237AK, TCCA STC SH18-22, EASA STC 10066008 and Argentina ANAC CTS-2105-11
