Venue™ smart monitor with Airshow HD

Upgrade Benefits:

- All-in-One Monitor
- Versatile Solution
- Airshow HD mobile app
- Cost-effective Cabin Entertainment Refresh

Smart Monitor features & benefits

- All-in-one solution combining hardware and software, simplifying installation and reducing size and weight
- HD and 4K resolutions offer a quality viewing experience just like home
- Enjoy personal streaming or auxiliary audio/video content with local HDMI 2.0 input
- Connect entertainment devices to your existing cabin audio system with analog audio output
- Enjoy seamless wireless passenger control with convenient control via mobile app or HTML
- Airshow HD entertainment unlocks moving maps in high definition

Personalized system - build your own

- 1: Choose your hardware configuration

- 2: Pick your software package – Foundation or Premium

The diagram illustrates the hardware configuration for the AIRSHOW HD system. A central monitor displays the AIRSHOW HD logo and the Collins Aerospace logo. To the left, 'Admin and maintenance jack panels' are shown with USB and Ethernet ports. Below the monitor, 'Analog audio out' is connected to two speakers, and 'PED control' is shown with a mobile app or Web HTML interface. To the right, a 'Wireless access point (WAP)/router' is connected to the monitor, and an 'Entertainment jack' is shown with a USB port. The background of the diagram is a cloudy sky.
