

Gogo 2025 Updates

Andy Fernandes

Director, Aftermarket Channel, US & Canada

Gogo's LTE Network Migration

Gogo Air-to-Ground connectivity

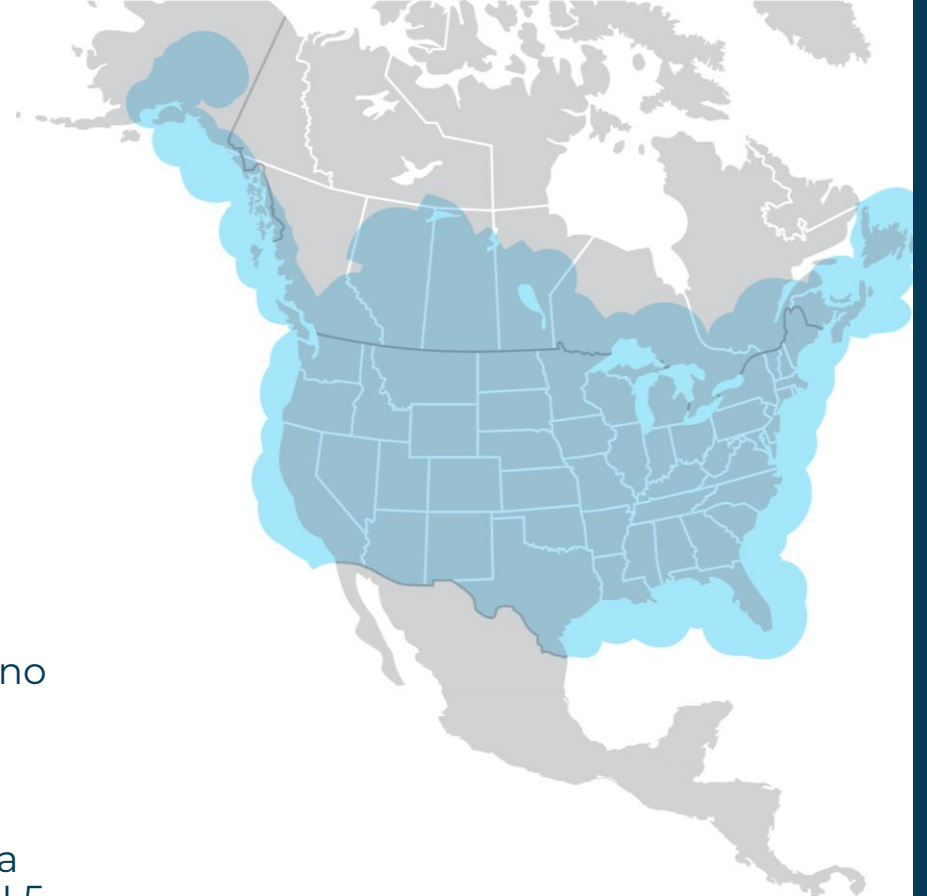

- CONUS and parts of Canada and Alaska
- Proven, reliable, essential connectivity
- Technological advances are delivering significant performance boosts

Current:

- **Gogo Biz** (legacy ATG, AVANCE L3, and AVANCE L5)

Future state:

- **Q4 2025: Gogo 5G** (AVANCE LX5 and X3)
- **May 2026: legacy ATG systems** – no network connection
- **May 2026: Gogo LTE** (AVANCE L3, AVANCE L5) – AVANCE L3 will see a 40% performance boost, AVANCE L5 will see a 10% boost (>3x higher performance than current legacy systems)

The ATG Licensed Network Today

- AVANCE L5's – **3,000+** aircraft in service
- AVANCE L3's – **1,900+** aircraft in service
- **ATG-XXXX's – 1,900 aircraft in service**

High-speed, low latency Wi-Fi

AVANCE LX5 & X3: Gogo 5G

- ATG – CONUS/Canada coverage

Gogo Galileo: LEO satellite

- Small form-factor global satellite coverage
- Aviation-grade future-proofed new technology

Core connectivity for cockpit & cabin

AVANCE L5: LTE

- ATG – CONUS/Canada coverage
- 3x improvement today over legacy ATG +10% on LTE
- Low-latency, reliable, full internet,

AVANCE L3: LTE

- ATG – CONUS/Canada coverage
- Immediate notable performance improvement + 40% on LTE
- Low-latency, reliable, web browsing, calls, SMS, pilot apps
- Low profile, flexible and affordable service plans

Maintain current Wi-Fi experience

Gogo C1: LTE

- ATG – CONUS/Canada coverage
- Similar Wi-Fi experience to your current service
- Minimal down-time for installation

Gogo Galileo LEO Satellite

- Enterprise-grade advanced Low-Earth-Orbit satellite network
- Two antenna options:
 - HDX – designed to fit on business aircraft of every size
 - Highly consistent speeds up to 60 Mbps
 - FDX – designed for best-in-class performance
 - Highly consistent speeds up to 195 Mbps
- Compatible with all AVANCE LRUs

Gogo Promotions end 12/31/2025

Inflight connectivity for all aircraft and missions

Upgrade options for Legacy ATG Customers
(ATG 1000/2000/4000/5000 systems on board)

Hardware options	Gogo Galileo (AVANCE SCS + HDX antenna)	AVANCE LX5	AVANCE L5	AVANCE L3	Gogo C1
Description	Global high-speed internet leveraging LEO satellite technology	Gogo 5G connectivity with the best ATG performance	Improved ATG connectivity today including streaming	Quickest, most cost-effective pathway to AVANCE	A form-fit replacement for ATG Classic*
Performance vs. ATG Classic	Avg. 55 Mbps, peak 60 Mbps	Avg. ~25 Mbps, peak 80 Mbps	~3x performance today	~1.5x performance today	Similar performance as ATG Classic today
Performance Boost after LTE network transition	N/A	N/A	~10% Improved performance after transition	~40% improved performance after transition	No change in performance
AVANCE	Yes	Yes	Yes	Yes	No
Compatible with Gogo Galileo antennas (HDX or FDX)	N/A	Yes	Yes	Yes	No
Availability	2025	2025**	Today	Today	Today
Hardware MSRP	\$150,000	\$141,500	\$141,132	L3 Plus - \$55,196*** L3 Max - \$72,168***	\$35,000
Installation Incentive Rebate	\$25,000	\$50,000	\$50,000	\$25,000	\$35,000
Final Hardware Cost	\$125,000	\$91,500	\$91,132	L3 Plus - \$30,196 L3 Max - \$47,168	\$0

* Not every legacy ATG installation is the same and there may be minimal re-pinning required. Please have your Dealer or maintenance personnel consult our Installation Manual.

** Install today with L5 + MB13 antennas to connect to 4G today and 5G at launch with a no cost LX5 LRU exchange.

*** Omni antennas may be able to be reused. Please consult an authorized Gogo installer.

Only certain Gogo promotions are funded by the FCC's Secure and Trusted Communications Reimbursement Program.

Q&A

Thank you!
