Manager Europe

Why Eutelsat OneWeb for **business aviation**

- Any platform, any mission
- Premium user experience
- Operational connectivity without compromise
- Reliable, guaranteed performance
- Committed roadmap
- World-class aviation ecosystem

Uniquely positioned.

The industry's only multi orbit, multi- band, inflight connectivity service provider.

11,000+

Aircraft in service

~700

Gogo Galileo Antenna Systems

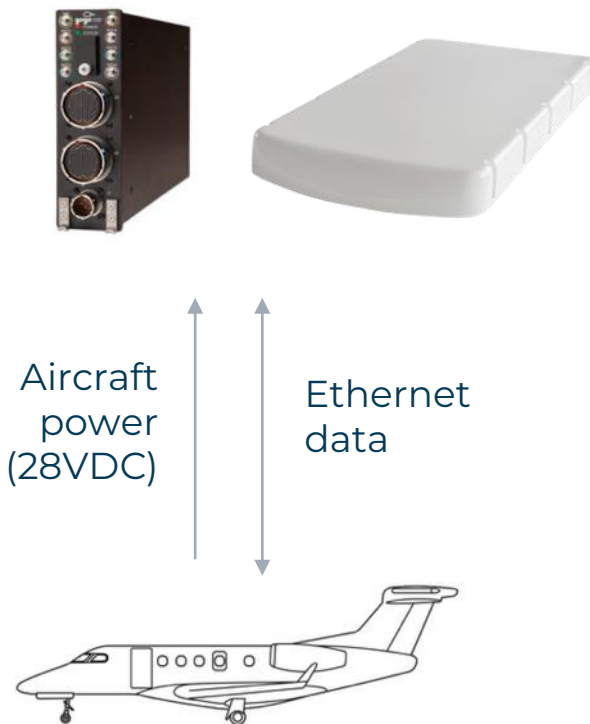

Gogo Galileo Electronically Steered Antennas

- High Speed
- Low Latency
- Global Pole-to-Pole Coverage
- Streamlined Installation
- Different aircraft, different needs and different missions

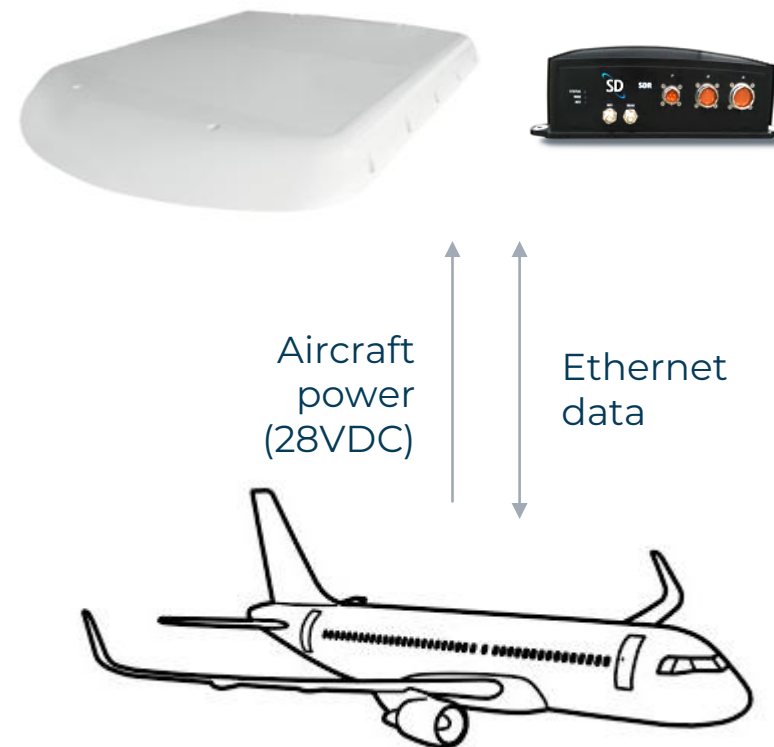

Simplicity Itself

Galileo HDX

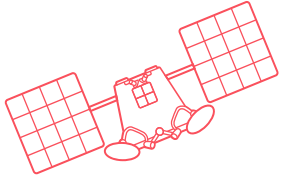

Galileo FDX

Eutelsat OneWeb

Agile, resilient architecture

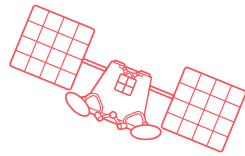

The OneWeb constellation comprises of **600+** individual Low Earth Orbit satellites

588 active satellites divided across **12** orbital axes

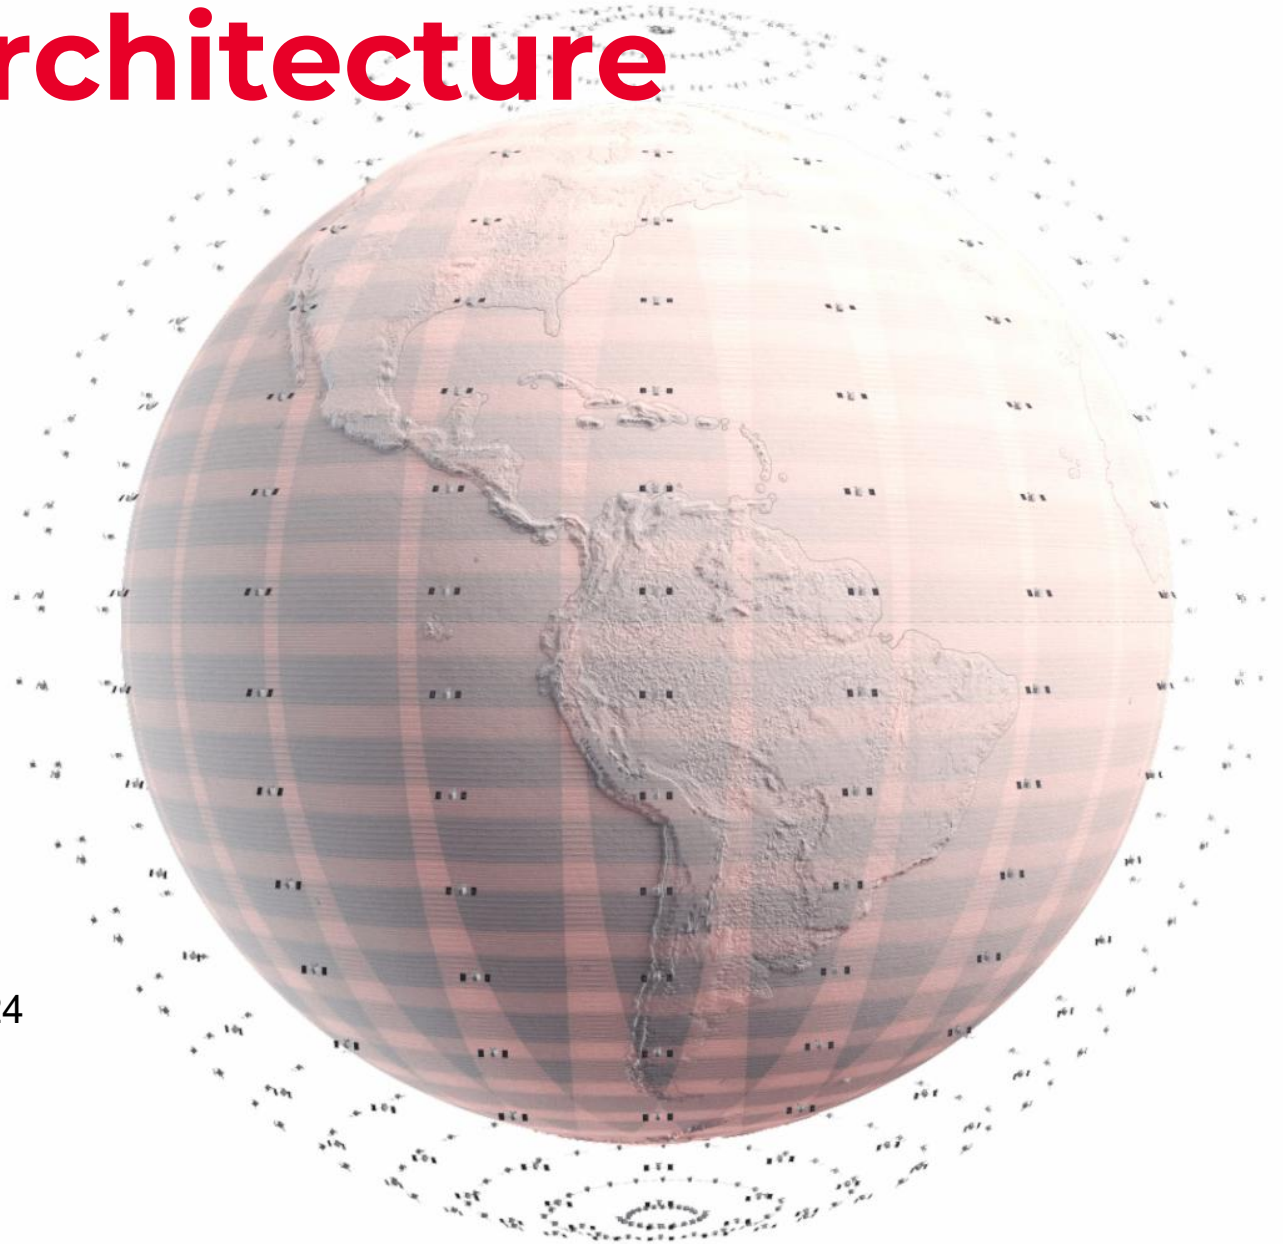

The **polar** orbital axes operate at an altitude of about 1200km above the Earth's surface in order to give global coverage.

20 additional spare satellites launched towards end of 2024 for added redundancy.

100 more to be launched in 2026-2027.

Galileo FDXr (Plane Simple® ESA) Ku-band Terminal

Galileo FDXr (Plane Simple® ESA)

Primarily focused on large aircraft frames:

- **Military Government deployments**

Galileo FDX for private aviation operators

Works with OneWeb LEO network
