

Avionics Services – *Aural Alert System*

A close-up, shallow depth-of-field photograph of a person's hand holding a black pen and writing on a red clipboard. The hand is positioned on the left side of the frame, with the pen angled towards the bottom right. The background is blurred, showing a person in a purple shirt and some greenery. The text "You are in good hands" is overlaid in the center of the image in a white, monospace-style font.

You are in good hands

Our Avionics *services*

Our Avionics services

Our highly capable workshop technicians have the capability to repair thousands of part numbers for general aviation and regional aircraft fleets.

We are also dealers and repair agents for most major avionics OEM's, supporting our customers with a dedicated sales team and over 2000 new, used, exchange and rental units in stock.

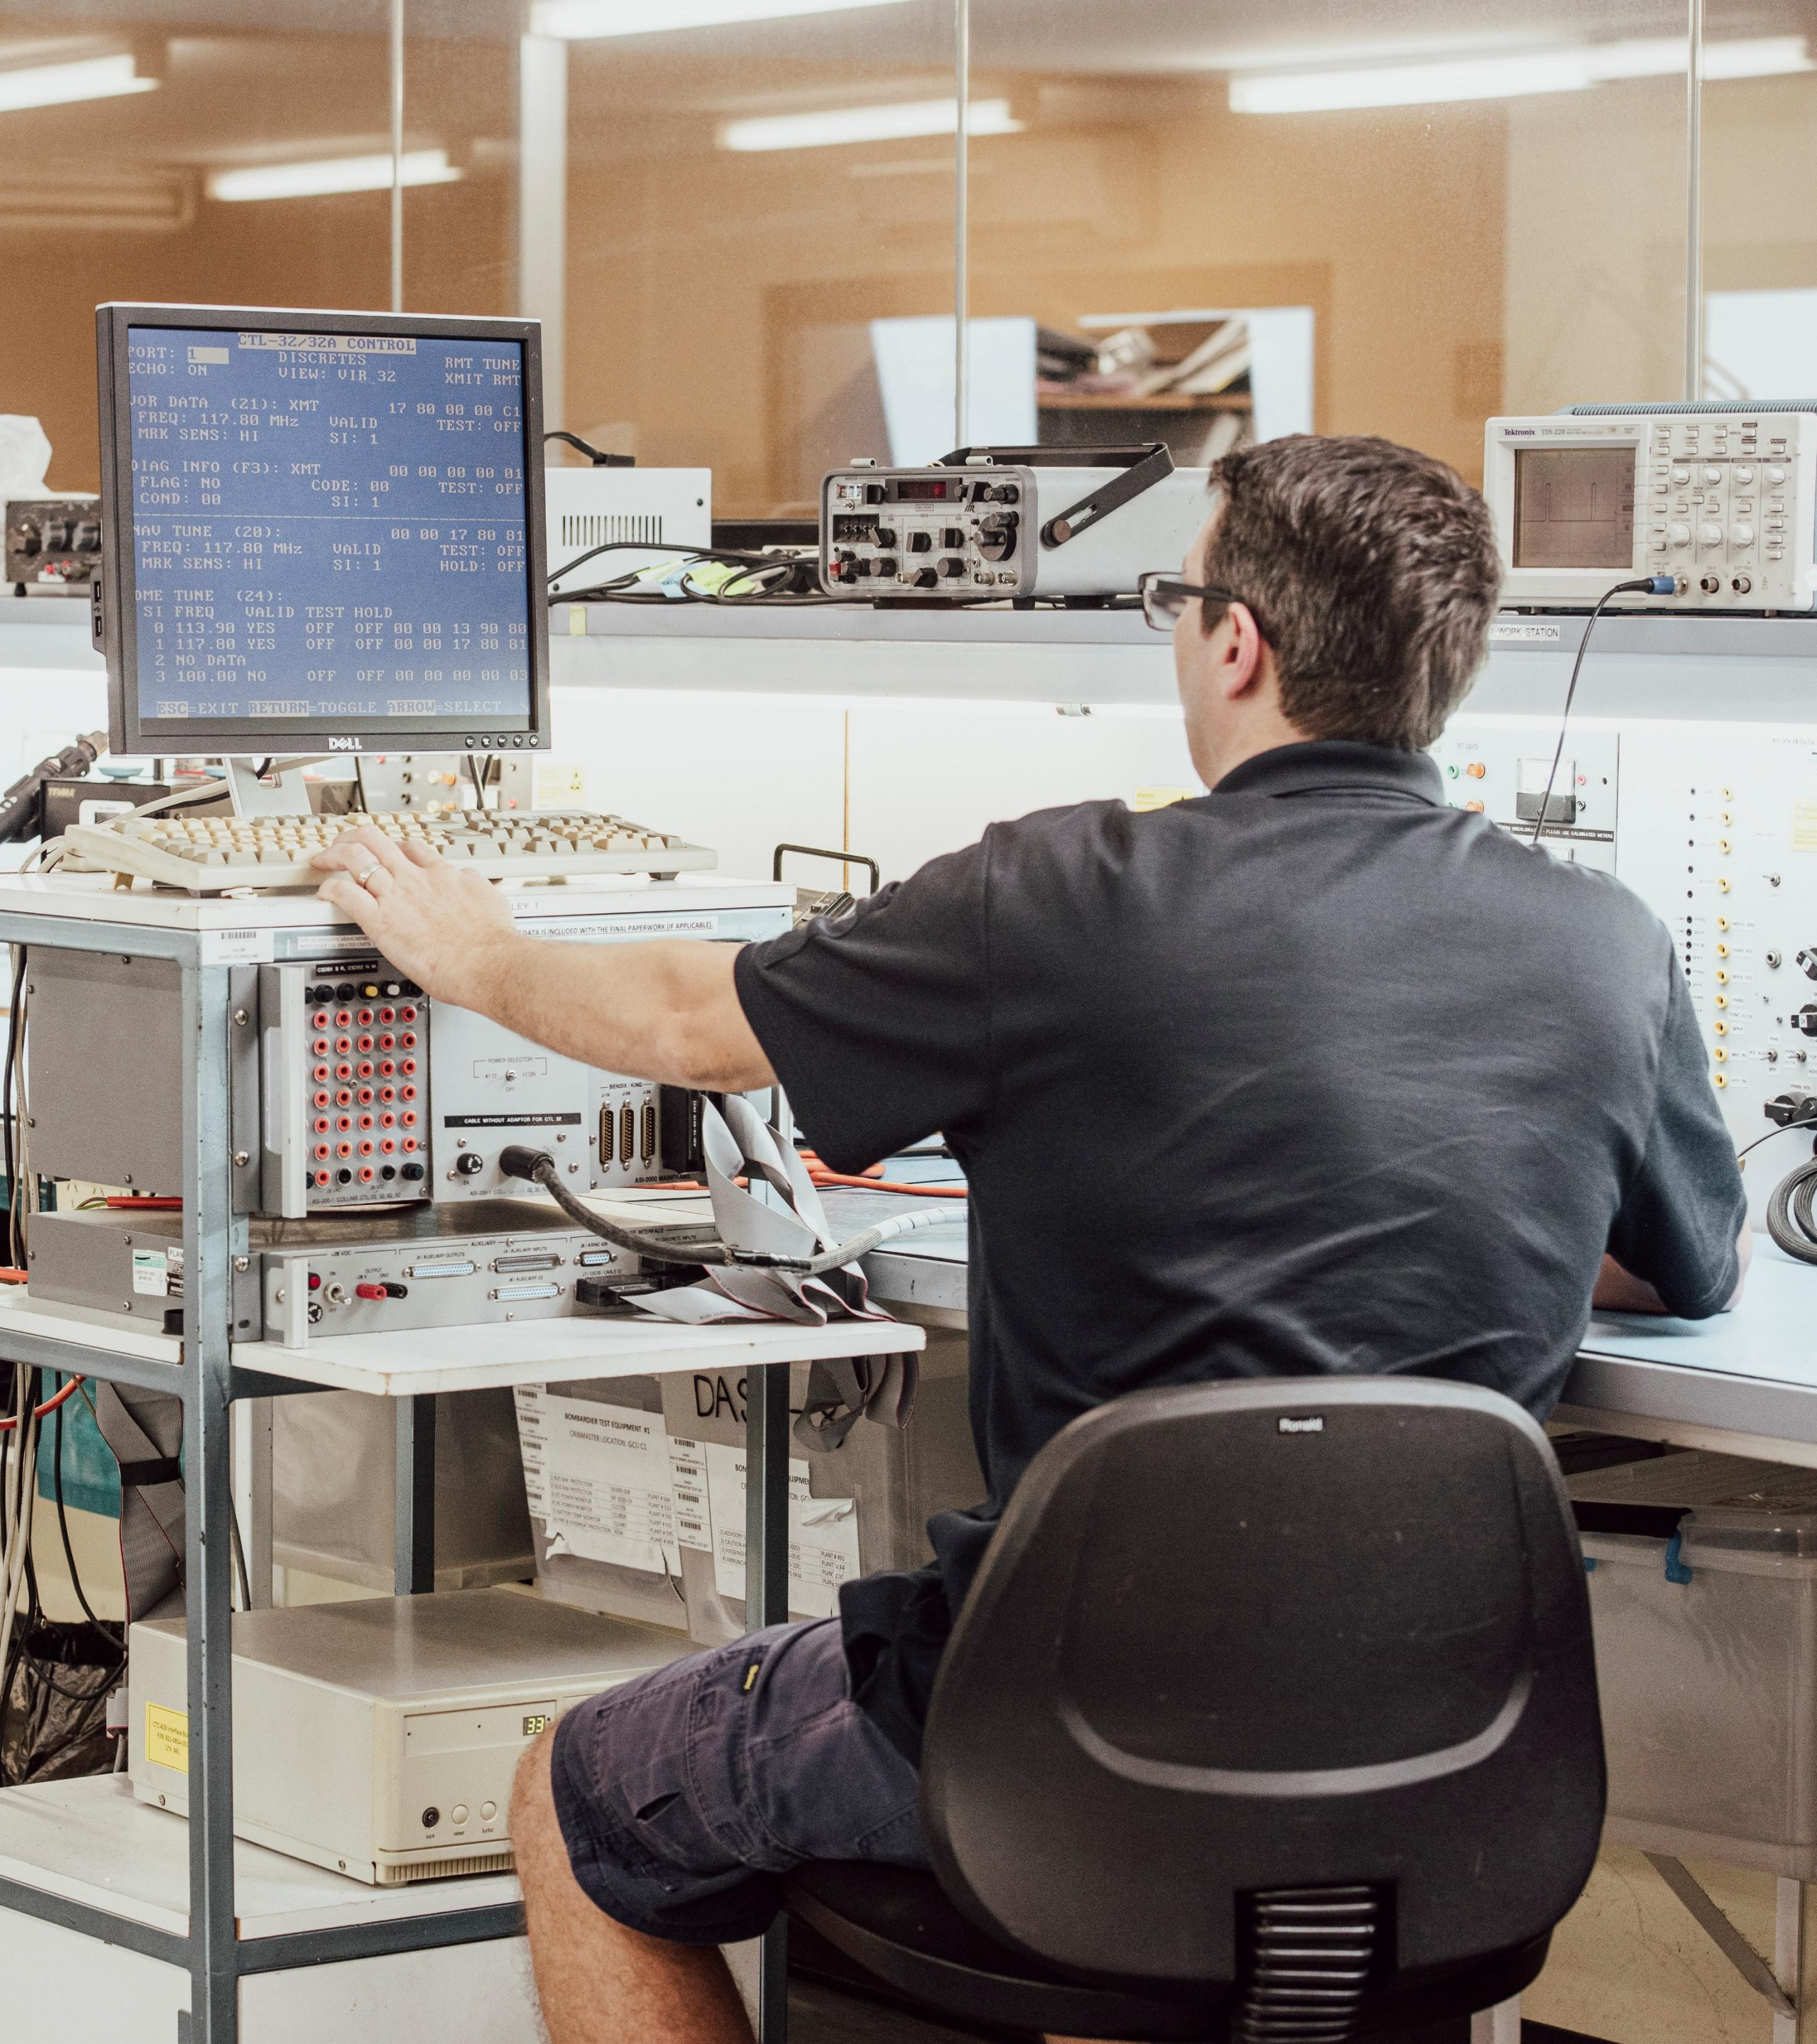

Repair Capabilities

- HF, VHF and UHF communications
- Engine instrumentation
- ELT's (Kannard & Artex)
- Weather radar Transceivers, Indicators & Antennas
- Gyroscopic instruments
- Flight Management systems (UASC)
- Pitot / Static instrumentation
- Autopilot systems
- Remote compass systems
- Transponder, DME and pulse systems
- Repair and fabrication of aircraft wiring harnesses
- GPS / Navigation equipment
- Audio equipment and headsets

Pratt & Whitney Canada *FAST™ Solution and Jet Aviation*

Get real-time insights of your engine health effortlessly with Pratt & Whitney Canada (P&WC) FAST™ solution that captures, analyzes and wirelessly sends full-flight data intelligence within minutes of engine shutdown. Jet Aviation is a key partner of P&WC in Australia providing seamless installation, sales, and support.

Why install a Pratt & Whitney Canada FAST™ solution?

- Optimizes maintenance planning driven by on-condition predictive maintenance
- Maximizes aircraft availability
- Supports aircraft troubleshooting and rapid return to service
- Reduces operating costs
- Reduces pilot and mechanic workload

Our Auxiliary Aural Alert *System*

Hear your engines *talking*

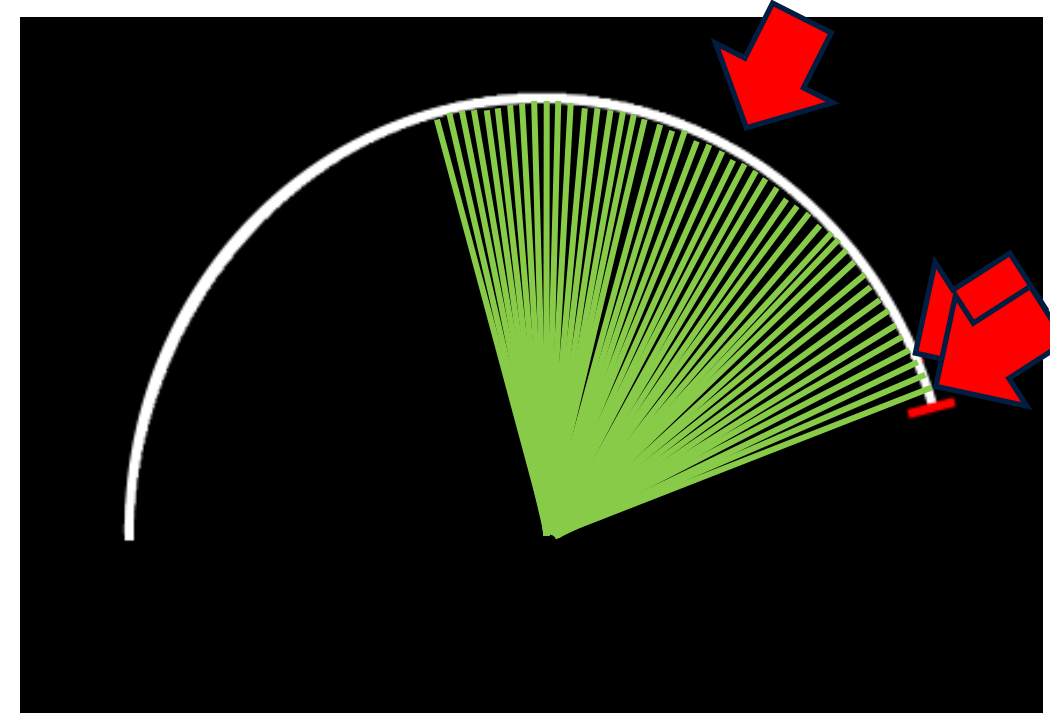

Why install a Jet Aviation Aural Alerting System?

- Designed to improve safety
- Alerts the pilot of engine ITT & Torque Exceedance
- Help reduce downtime of aircraft
- Deliver savings on maintenance costs.
- Suited to PWC Engines & Aircraft with PWC DPHM FAST/ADAS
- FAA and CASA Certified

Engine ITT – *without Aural Alerter*

Engine starts to
heat up.

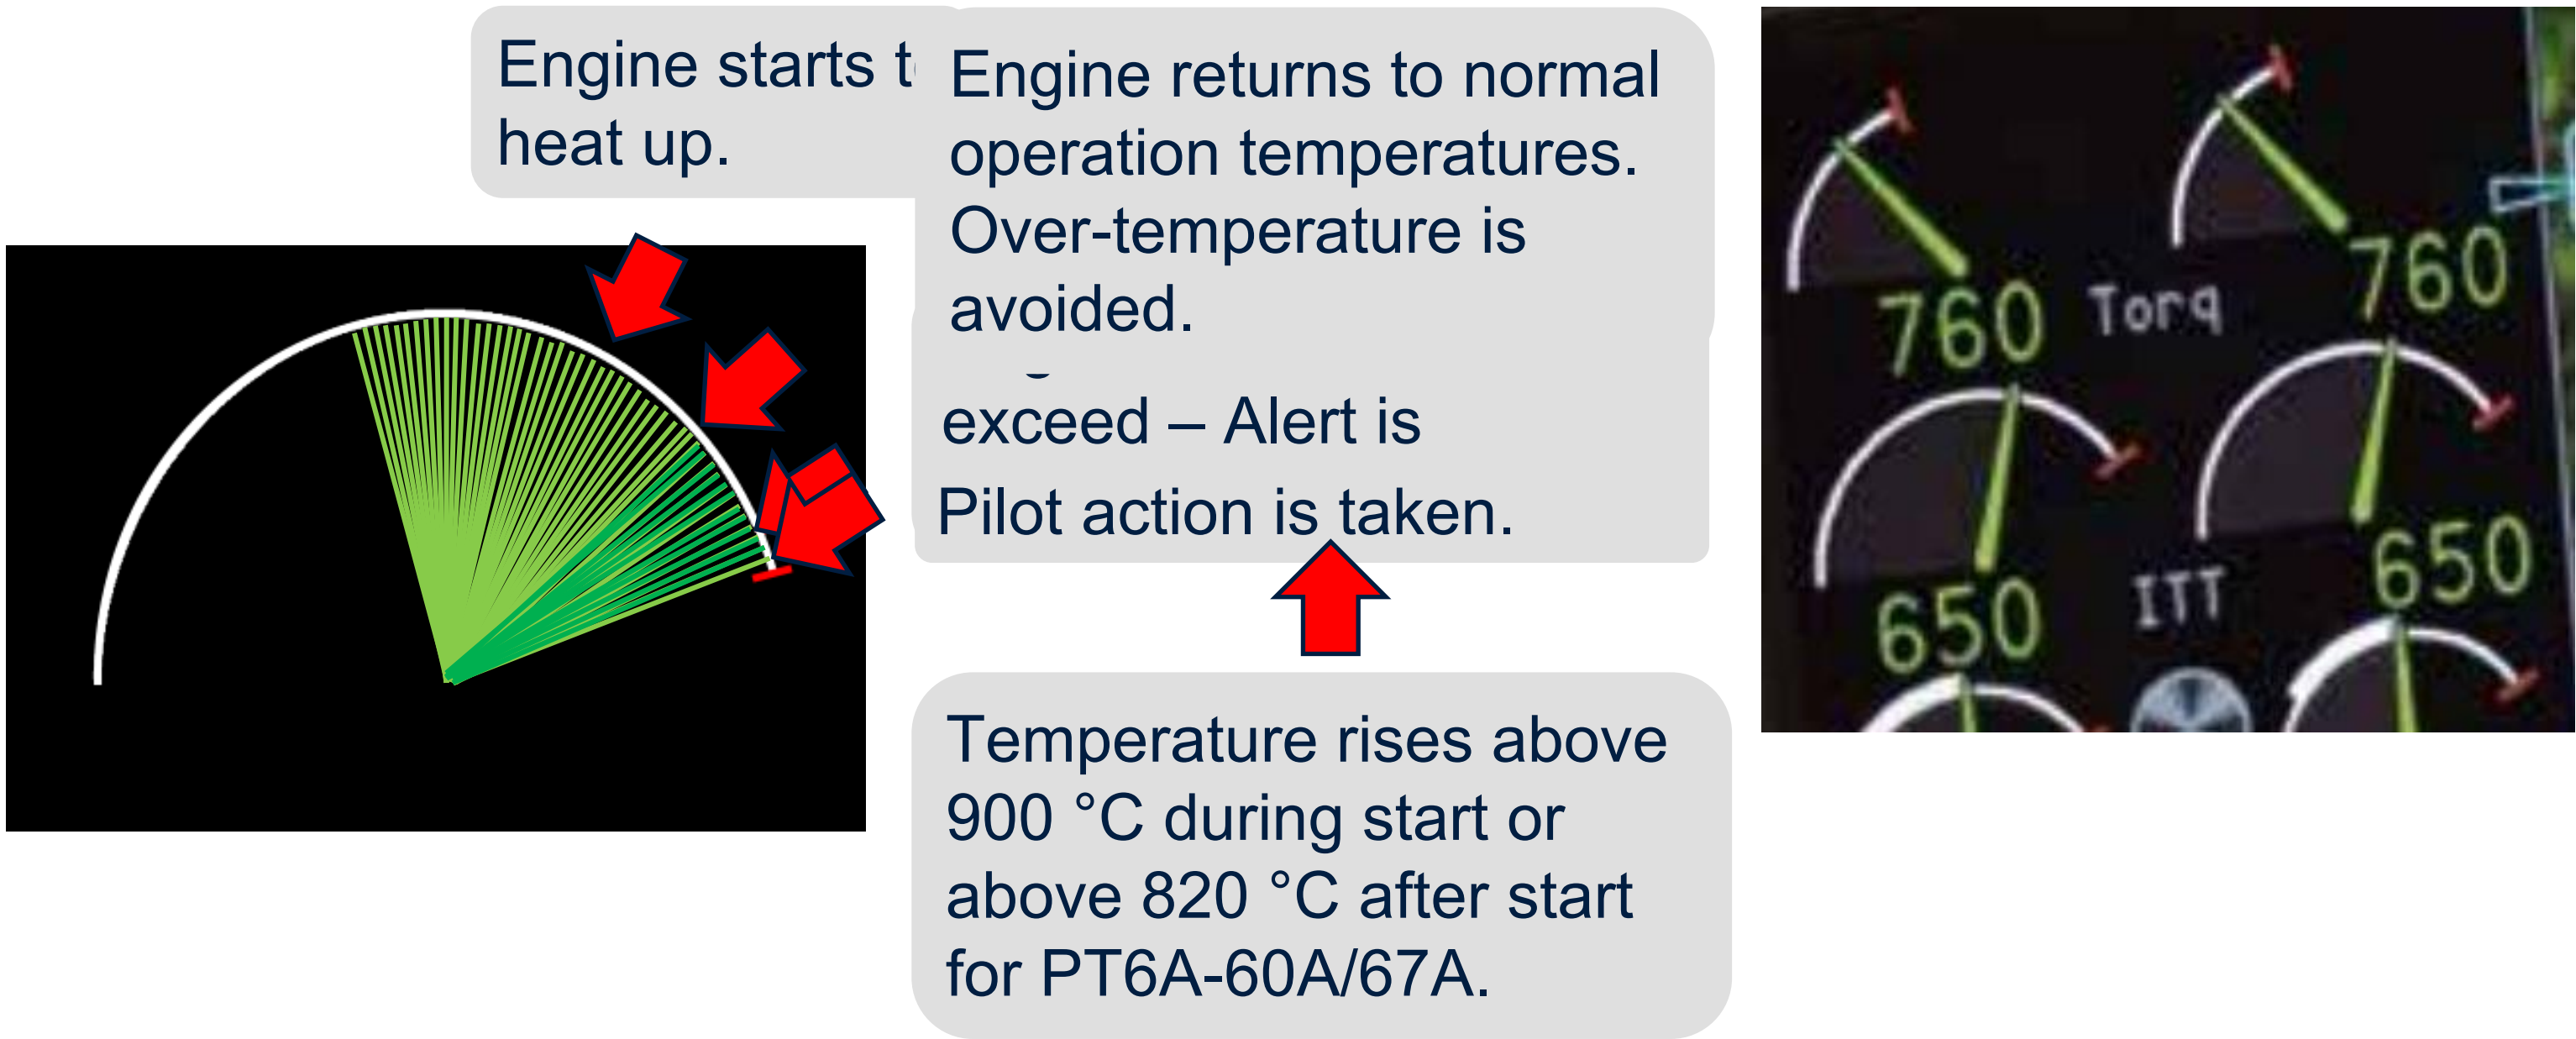

Engine over temperature
occurs – maintenance
actions are required.

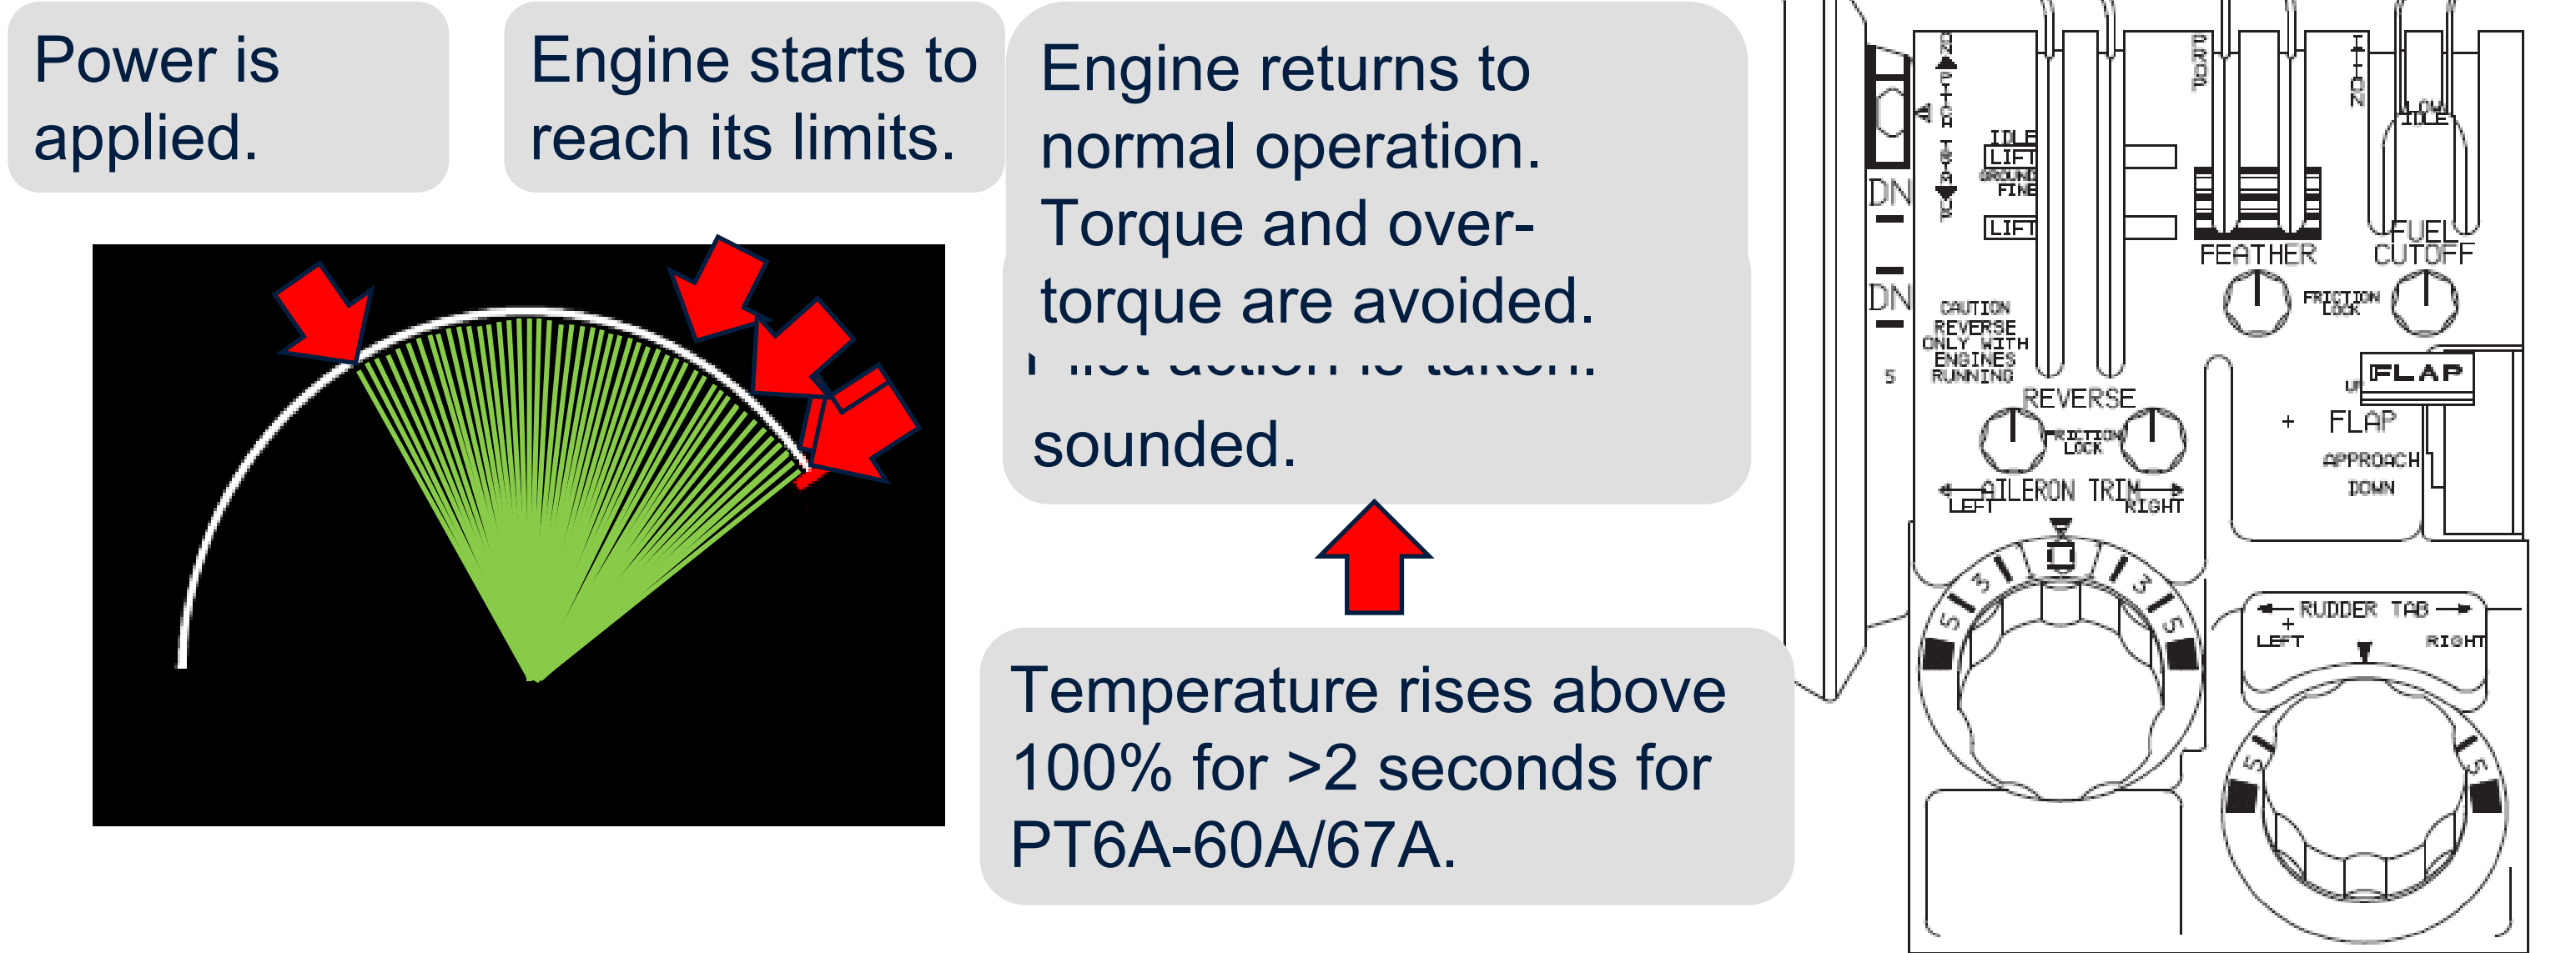

Temperature rises 900 °C
during start or above 820
°C after start for PT6A-
60A/67A.

Engine Itt – *with Aural Alerter*

Engine torque – *with Aural Alerter*

Aircraft Coverage

CASA & FAA STC

- King Air C90
- King Air B200
- King Air B300
- King Air Model 1900C/D
- Cessna Caravan C208/B

We are able to tailor solutions for your specific aircraft and operational needs.
