Overview

- 1. TCCA Organization**
- 2. Internal Process Bulletin**
- 3. Regulatory Development**
- 4. Guidance Material**
- 5. International Agreements**

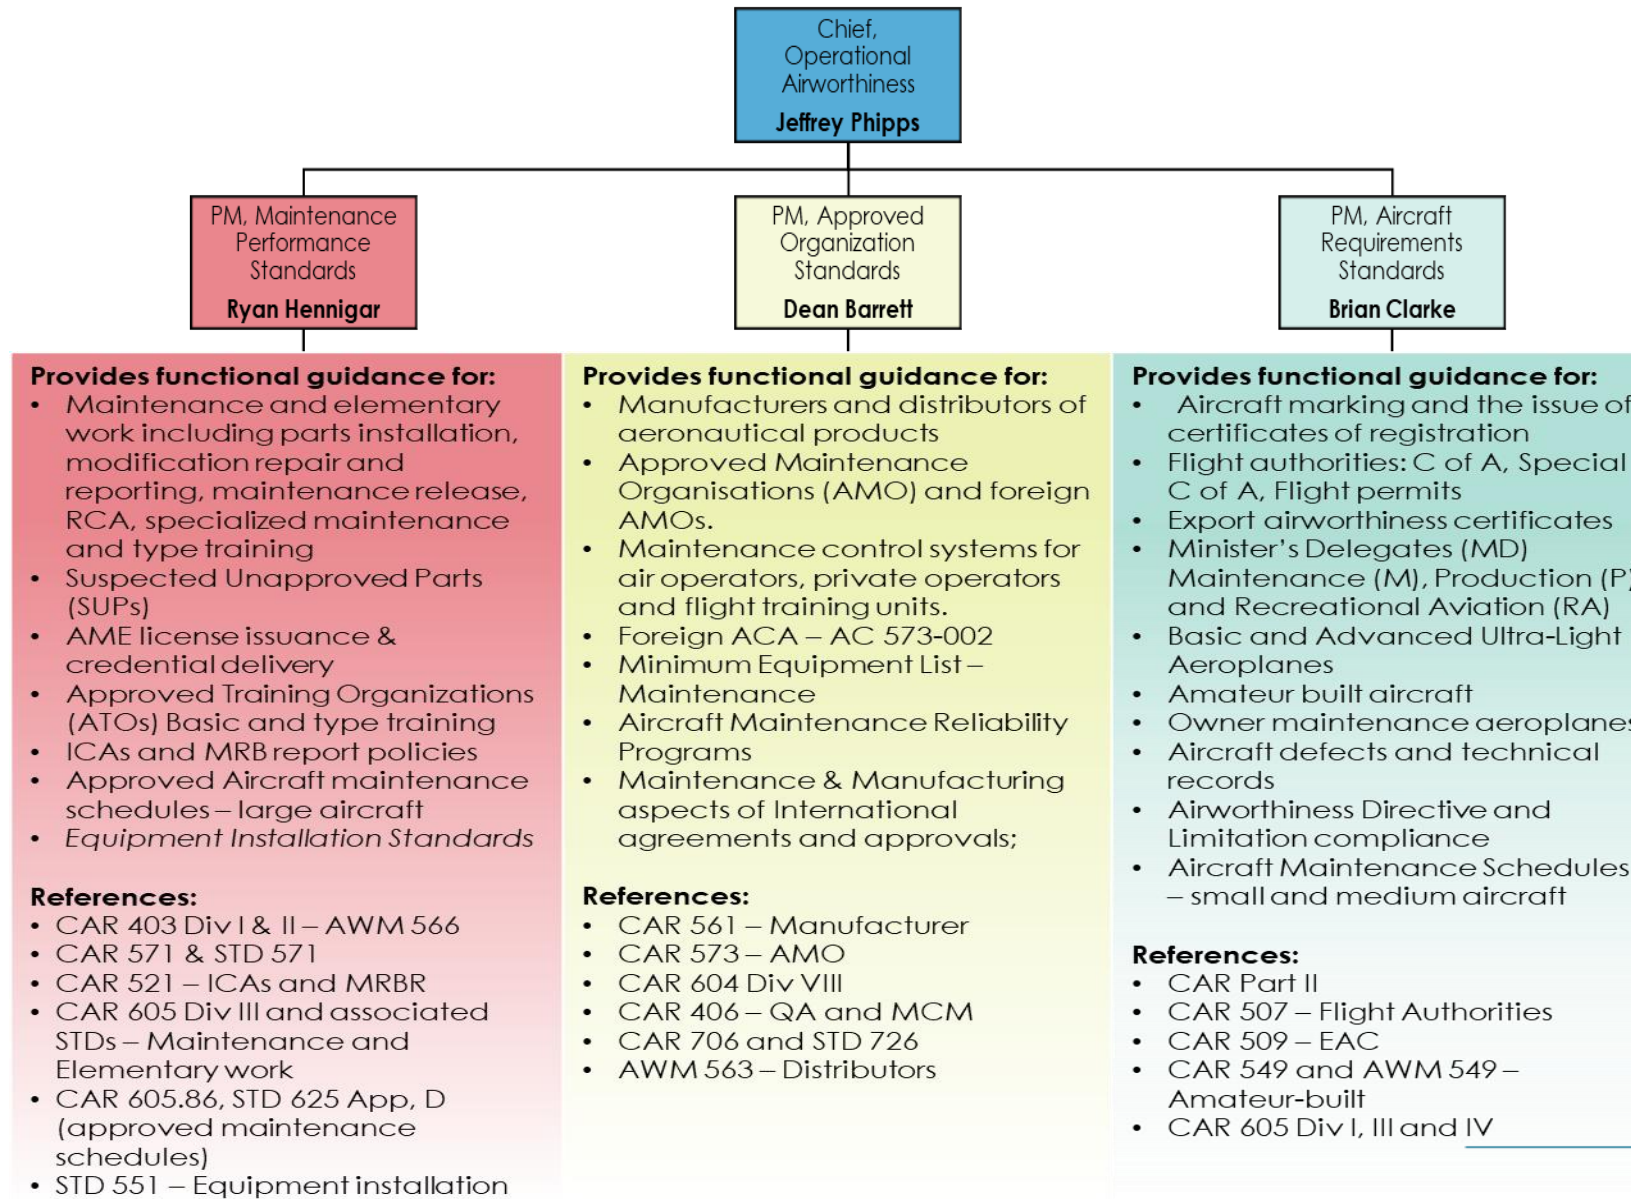

Transport Canada Civil Aviation (TCCA)

Standards Branch

Operational Airworthiness

Internal Process Bulletin (IPB)

- **IPB 2020-02** Issue 7, **AME Basic Training**, expires on June 30, 2026:
 - Removed COVID related content, cap alternate delivery of 25% of theory;
- **IPB 2020-06** Issue 8, **AME Type Training**, expires on June 30, 2026:
 - Removed COVID related content, 5% hands-on delivered in-person;
- **IPB 2020-08** Issue 5, **AME Applications and Process Changes**, no expiry:
 - Updated procedures for AME applications forms and supporting documentation via email. IPB will be cancelled when MSI-18 is replaced with the new AME Licencing Advisory Circular.

Regulatory Development

Notice of proposed Amendment (NPA): Approved Training Organizations (AME basic and type)

- Work delayed due to ICAO USOAP related work;
- Planned ATO consultation in 2026 and NPA publication end of 2026 or early 2027.

NPA: AME Licensing curriculum and skill tasks

- Review of “S” curriculum and skill has begun;
- CARAC process for consultation, including focus group.
- Associated timeline in development.

Regulatory Development (cont'd)

Other Upcoming NPAs

- Undocumented Parts – STD 571 and 573 – with supporting Advisory Circular (AC) – Q3 2026;
- Evaluation Program – CAR 406 and 706 – Q1 2026;
- Airworthiness Manual (AWM) 563, Distributors, Q3 2026:
 - Adopt the ASA-100 Quality System Standard by publishing an AC that will introduce a voluntary industry distributor program. Similar approach to the FAA (AC 00-56B) and other authorities.
- Aircraft owners/operators to maintain up-to-date documentation on installed FDRs and ensure their availability to accident investigation authorities – STD 625 – Q1 2026:
 - parameter allocations required by STD 625.33;
 - engineering unit conversions for each installed FDR;
 - correlation, calibration test results, and details of other maintenance performed on the installed FDR.

Guidance Material

New Advisory Circulars:

- AC 573-006, Issue 02: Technical Arrangement- Maintenance Between Canada and the United Kingdom;
- AC 573-010, Issue 01: Maintenance Annex Guidance – Bilateral Aviation Safety Agreement Between Canada and the European Union;
- AC 571-026, Issue 01: Parts Removed from an Aircraft No Longer in Service and Disposal of Scrapped Parts;

Note: an associated AC will be developed to provide information and guidance on aeronautical products removed from in-service type certified aircraft.

- AC 507-002, Issue 01: Certificate of Airworthiness;
- AC 201-002, Issue 01: Aircraft identification and Marking;
- AC 202-002, Issue 01: Aircraft Registration.

Guidance Material (cont'd)

Upcoming Advisory Circulars:

- Approved Maintenance Organization Approval;
- Performance and Certification of Maintenance in an AMO (ACA-SCA);
- Specialized Maintenance;
- Manufacturer Approval and Supplier Control;
- Suspected Unapproved Parts Reporting;
- Independent Inspection of Control Systems (replacing AN C010);
- AME Licensing (replacing several documents);
- Approved Training Organization Approvals.

International Agreements

TCCA-FAA, MIP Revision 2

- Revision 2 was signed on September 9th, 2025.
- Significant changes:
 - Removal of section B 4.1 (c) and (d), OEM Recommendation and Territorial Limitation;
 - Revised Section B and Section C to clarify the use of other work instructions that would be acceptable;
 - Revised major repair or modification reporting instructions to the Authority;
 - Revised current TCCA Suspected Unapproved Parts reporting guidance;
 - Expanded the conditions regarding line maintenance activities;
 - Added information regarding technical data approved for use for major repairs and alterations;
 - Revised to require any major repair or alteration to be returned to service by an appropriately rated AMO as required by 43.17 (e)(1), which includes non-specialized work performed on aircraft not operated in a commercial air service.
- Minor editorial changes (definitions, spelling, punctuation, etc.);
- AC 571-002 also being updated to support Revision 2.

International Agreements (cont'd)

TCCA-UK, TA-M

- Revision 1 of the TA-M was signed on February 14, 2025;
- Summary of Revision 1 changes:
 - Addition of Sampling Inspection System (SIS) requirements;
 - Addition of procedures to manage facilities located outside the UK;
 - Updated application forms;
 - Minor editorial changes.
- First UK CAA SIS visit performed on TCCA AMOs in March 2025.
